

Linking Land Use to Clean Water

Making the Connection for Community Leaders

A workshop for elected and appointed officials including city council members, planning commission members, park board members, watershed advisory board members, and other city and community leaders.

May 8: Barr Engineering, 4700 W 77th St, Edina

May 14: Bayview Event Center, 687 Excelsior Blvd, Excelsior

These workshops provide local leaders an opportunity to increase their knowledge and understanding about the connection of land use decisions to water resources and on ways to protect and improve these assets in their community, including:

- The connections between land use decisions and the management of stormwater runoff, impervious surfaces, and nonpoint source pollutants.
- The 3P's - Planning, Practices, and Policies to minimize or prevent impact to water resources.
- Technical, financial, and education resources available to improve and protect water resources.
- Planning for groundwater sustainability in 21st century Minnesota.

Agenda

- 5:30 – 5:45** **Introductions | Workshop Goals | Objectives**
May 8th Steve Kloiber and Erica Sniegowski, Nine Mile Creek Watershed District
May 14th Leslie Yetka, Riley Purgatory Bluff Creek Watershed District
- 5:45-6:15** **NEMO 101: Linking Land Use to Clean Water**
Presenter: John Bilotta, University of Minnesota Extension

About NEMO

The NEMO (Nonpoint Education for Municipal Officials) program provides education and training to community leaders including elected and appointed officials and citizen leaders about water resources, the impacts from land use, and strategies for protection and restoration. Goals include providing leaders with knowledge, skills, and research results to assist them in making informed local decisions that support clean water in their communities

*Workshops presented by University of Minnesota Extension and Sea Grant
Programs in cooperation with and support from:*

Bassett Creek Watershed Management Commission, Carver Water Management Organization, Minnehaha Creek Watershed District, Nine Mile Creek Watershed District and the Riley-Purgatory-Bluff Creek Watershed District.
